

## **Energex Construction & Maintenance**

**Project:** CL41 Contract for Provision of Construction & Maintenance Services on the Energex Low Voltage & High Voltage Networks  
**Client:** Energex Ltd  
**Location:** South East Queensland  
**Duration:** July 2005 to Dec 2010

Under this contract Electrix provided construction & maintenance services on the Energex distribution network in the Brisbane region. This contract was for an initial 3 year term but was successfully rolled over for further terms.

The scope of work included replacement of poles and cross arms, up-rating of pole and ground mounted substations, RMU maintenance and both overhead and underground system maintenance and construction.

The contract utilized up to 26 Electrical and Administration staff together with associated plant and equipment.

The work required significant planning and co-ordination with Energex and required Electrix to meet stringent contract KPI's. The performance of Electrix assisted Energex in reducing the down time on its network, thus further improving the reliability and service provided to customers.

Energex places a significant emphasis on safety and the Electrix systems and procedures provided a strong foundation for safe work practices.
