

# **Ergon Energy – Construction and Maintenance - Southern Region**

**Project:** *Ergon Energy – Construction and Maintenance Southern Region Project*  
**Client:** *Ergon Energy Ltd*  
**Location:** *Queensland – Hervey Bay & Toowoomba*  
**Duration:** *April 2004 to April 2010*

Electrix was successful in tendering for the Construction and Maintenance in Southern Region with Ergon Energy in April 2004 for a 2 year plus 1+1+1 year contract term.

The contract initially required Electrix to supply labour, plant and supervision for 4,000 man-hours per month, located at depots in Hervey Bay and Toowoomba in Queensland. The resource levels were progressively increased to a capacity for 8,500 hours per month to meet Ergon's increased work loads.

The contract required Electrix to supply personnel in Overhead and Underground construction and Maintenance to perform works across the Southern Region of Queensland.

The project involved significant challenges including:

- Management of fluctuating work loads and mix of work
- Extensive travel across wide geographic areas
- Working under arduous climatic conditions
- Requirement for a significant investment in local resources and infrastructure to support this work

The contract was successfully extended on a number of occasions until April 2010.
