

SP AusNet Public Lighting Maintenance

Project: Public Lighting Maintenance
Client: SP AusNet
Location: Victoria
Duration: April 2011 – March 2014

In March 2011 SP AusNet awarded Electrix Pty Ltd a contract for the provision of Public Lighting Maintenance and Bulk Change Services across their Network. The contract covers the outer eastern and northern suburbs of Melbourne plus the eastern half of Victoria, and is for a three year term.

Under this contract Electrix will provide the following services for the 108,000 public lights managed by SP AusNet:

- Maintenance and repair of street lights reported as faulty or defective by the public and customers;
- Routine patrols to identify and repair defective lights;
- Bulk change programs for cyclical replacement of globes;
- Replacement of existing lights with energy efficient fittings;
- Supply and logistics management for all light fittings and materials required for the works.

The award of this contract builds on our five year relationship with SP AusNet and further expands on the range of services provided by to them by Electrix.

The contract is managed from a newly expanded Electrix office in Thomastown and utilises up to 15 field personnel located across the region.

The contract provides many challenges to successfully meet tight service response times and manage the material supply logistics across a large geographic area and mix of urban and rural locations.
