

# Energex Construction & Maintenance

**Project:** *Energex CL41 – Provision of Construction & Maintenance Services on the Energex Low Voltage & High Voltage Work*

**Client:** *Energex Ltd*

**Location:** *South East Queensland*

**Contract Value:** *\$3Million p.a. guaranteed min.*

**Contract Duration:** *July 2005 to Dec 2010*

Electrix is currently working on a construction & maintenance contract on the Energex distribution network in the Brisbane region. This contract was for an initial 3 year term but has been successfully rolled over for further terms.

The scope of work covers replacement of poles and cross arms, up-rating of pole and ground mounted substations, RMU maintenance and both overhead and underground system maintenance and construction.

The contract requires up to 26 Electrical and Administration staff and associated plant and equipment.

The work requires significant planning and co-ordination with Energex to ensure Electrix meet stringent contract KPI's and further improve the services provided to Energex and their customers, thus helping to reduce the down time on the Energex network.

Energex places a significant emphasis on safety and the Electrix systems and procedures provide a foundation for safe work practices.

Electrix success with the continuing rollover of this contract is evidence of the strong relationship that has been developed with Energex over the contract period.
