

# Ergon Energy – Construction and Maintenance - Southern Region

**Project:** Ergon Energy – Construction and Maintenance Southern Region Project

**Client:** Ergon Energy Ltd

**Location:** Queensland – Hervey Bay & Toowoomba

**Contract Value:** \$9 - 12 Million p.a.

**Contract Duration:** April 2004 to April 2010

Electrix was successful in tendering for the Construction and Maintenance in Southern Region with Ergon Energy in April 2004 for a 2 year plus 1+1+1 year contract term.

The contract initially required Electrix to supply Labour, Plant and Supervision for 4,000 manhours per month, located at depots in Hervey Bay and Toowoomba in Queensland. The resource levels were progressively increased to a capacity for 8,500 hours per month to meet Ergon's increased work loads.

The contract requires Electrix to supply personnel in Overhead and Underground construction and Maintenance to perform works across the Southern Region of Queensland covering an area 3 times the size of Victoria.

The contract has been successfully extended on a number of occasions and currently operates until April 2010. These contract extensions demonstrate the strong relationship with Ergon Energy and have allowed Electrix to make a significant investment in local resources and infrastructure to support this work.
